

Active Directory Phase 4

1. Users and Organizational Units

Open Active Directory Users and Computers

Navigate to:

Tools > Active Directory Users and Computers

2. Create Organizational Units

Right-click <yourname.lab> and select **New > Organizational Unit**

Create the following organizational Units (OUs):

- Users (OU)
- Computers
- Sales
- HR
- Accounting
- IT

3. Create Example Users

For demonstration purposes, the process below outlines how to create a single user account. In this project, four user accounts will be created.

Inside the Sales OU:

- Right-click and select New > User
- Enter the first name, last name, and user logon name

Real companies typically use naming conventions such as:

- First initial and last name (jsmith)
- First name and last name separated by a period (john.smith)
- Click **Next**
- Set a password
- For this lab, **uncheck** the “User must change password at next logon” check box
- Click **Finish**

4. Examine user properties

Open one of the user accounts and review the available tabs.

Understanding these settings is valuable because helpdesk technicians and system administrators regularly use them to manage user accounts and troubleshoot issues.

5. Practice Common Administrative Tasks

Disable an Account

- Right-click a user account
- Select **Disable Account**
- A down-arrow icon will appear on the account
- Re-enable the account afterwards

Reset a Password

- Right-click a user account
- Select **Reset Password**
- Assign a temporary password or enter a password provided by the employee.
- If a temporary password is used, select **User must change password at next logon** to require the user to create a new password during their next sign-in

Rename a User

- Open the properties of a user account
- Modify the necessary name fields
- If the user logon name must also be changed, open the **Accounts tab**
- Update the user logon name
- Click **Apply**, then **OK**

Move a user

- Drag the user account John Smith from the Sales OU to the IT OU
- A warning prompt will appear. Review the message and confirm that the correct object is being moved
- Click **Yes**
- Move the account back to the Sales OU and click **Yes** again

Lessons Learned

- Password Resets
- Account Unlocks
- User Creation
- User Termination
- Department Transfers
- Account Disabling

Next Steps

Phase 5 – Security Groups

- Accounts
- Global Groups
- Domain Local Groups
- Permissions
